

**ENCOMPASS**

# Encompass Southwest

Working across Northern Devon to End Homelessness, Rough Sleeping and the impacts of Poverty

Leading System Change work for Devon- Supporting to navigate complex systems using trauma informed and collaborative approaches

# Encompass Principles

**Relationships** - We will value each other as individuals and value difference. It is ok to show ours, and for others to show their, vulnerability, emotions to laugh, cry and be angry. We will try to create an environment where we make space to invest in relationships. Humor can be seen as a good ice-breaker when meeting someone for the first time -we can have humor and still hold safe boundaries.

**Compassion & Kindness** - We will try to be caring with competence and self-aware about how we project ourselves to others. We will be real in every interaction, ensuring that we really listen to each other and support each other to be compassionate and kind, importantly we will recognise when we need to show compassion and kindness to ourselves.

**Making a Difference** - We will do our best and will not make promises we cannot keep. We will support people to achieve their individual goals and not our goals and will be courageous in our day-to-day work.

**Inclusiveness & Equality** - We will be curious about others and acknowledge we can learn from each other recognizing each other's individuality and contribution.

**Collaboration** - We recognise that we are stronger together than we are individually, we will make every conversation matter, recognising our own individual strengths and weaknesses and acknowledge where we can collaborate with others for the wider good.

**Equity** - We recognise that everyone has different circumstances and receives what is needed for a fair outcome.
